

Six Brothers attended the summer session of the university. They were Brothers Andrews, Smith, Leggitt, Randall, Frank Clark, and Owen. Brother Andrews, '16, was working toward his master's degree in ecology, his investigations having carried him into fields hitherto untouched by the ecologist.

Since the middle of June there has been stationed at Champaign a branch of the United States School of Military Aeronautics. It has called to the university district about six hundred future aviators. It is at this school that preliminary theoretical training is given the aviators before they enter into actual flying practice. Brother Davidson, Φ X, was registered in this department and became acquainted with the Φ K Brothers in summer school. Brothers Cornell and Brotherton, both Φ K Graduates, will be enrolled in this school for eight weeks during September and October.

Our prospects for the fall look very good in view of the fact that at least seventeen of the old men will be on hand to start the year. More than ever before will our men be forced into campus activities. This is to be brought about by the execution of rules laid down by the General Welfare Committee, whereby activities are found for each individual, and he is compelled to engage in the form of activity recommended. Every Brother will be required to participate in at least two forms of activity which will bring him more or less into prominence on the campus.

Since the date of our last letter we have been pleased to welcome as visitors Brothers National President Staunton; Dunham, Φ Ω ; Giblyn, Φ I; Forbes, Φ H; Davidson, Φ X; and Brotherton and Clayton of Φ K.

HAROLD P. OWEN.
