University of Illinois

OAKLEY DORION

CHAPTER CORRESPONDENT

♀ EVERYONE HERE at Phi Kappa is still sitting tight and still not quite knowing what is going to happen next. However, at the time of this writing, the future doesn't look too dark. Of course, one never knows when a cloud is coming over to change everything. Most of the fellows now are in some sort of reserve—be it Navy, Army, Air Corps

or what have you. Anyway all of the Brothers and pledges that are still here are giving out with the best they have. About a month or so ago, the Army Engineers were around looking over the Chapter House. It seems that all fraternity, sorority, and large independent houses are being measured by the government just in case it is necessary for them to be taken over for housing facilities by the Armed Forces training here on campus.
